WS PRO SERIES 1.9MM

GLENVIEW, IL - This distinctive project features our custom WS model 1.9mm panels at the ABT Electronics Showroom and Gallery, north of Chicago. Our LED panels, which elegantly wrap around the entire column of the flagship showroom, transform the space into a dynamic digital canvas. This project transcends the traditional concept of a direct-view LED wall, redefining the area as a digital gallery and showcasing the scalability, customization, and modularity of our LED display products.

The WS panels, renowned for their superior image quality and versatility, exemplify our commitment to cutting-edge technology. With features like seamless integration, high resolution, and vivid color reproduction, these panels elevate any space into a realm of digital artistry and expression. This installation at ABT Electronics not only enhances the visual experience but also underscores the innovative possibilities of our LED display solutions.

We extend our gratitude to our partners, 3D Exhibits, a Sparks Company, and Taylorleds, for their exceptional collaboration.
