

Project Highlight

Taylorleds

NORTH DAKOTA - Highlighting the advanced technology at the Network Operations Center of DCN, LLC, our ATS 1.5mm direct view COB video wall, measuring 16' wide and 5.6' high, provides unparalleled visuals. This state-of-the-art display enhances our ability to monitor and manage network operations with exceptional clarity and detail, ensuring swift responses to any issues. Special thanks to AVI Systems for integration and Bormann Marketing for sales and support.

Dakota Carrier Network (DCN) began in 1996 as a unique partnership between our 13 owner companies. This collaboration has continuously grown, helping businesses, banks, hospitals, and government entities trust their technology and focus on what matters most. North Dakota has been recognized by several publications and organizations as having one of the best data networks in the United States.
