

ATS PRO Project Highlight

Taylorleds

WU PRO SERIES 2.5MM

MT MORRIS, PA - We completed a comprehensive technology upgrade at Mount Morris Gospel Tabernacle, enhancing their worship experience with state-of-the-art equipment. Our team orchestrated the design, installation, and integration of an Electronic Theatre Controls stage lighting system, three high-resolution ATS-Pro video walls, a new video system featuring Blackmagic Design 4K Ursa cameras and a Resi Media, LLC streaming encoder. Acoustical treatment panels, complemented by the Allen & Heath AH-SQ-7 audio console, ensure pristine sound quality, while a retrofit of their existing house lighting further modernizes their facilities.

Central to the upgrade are three Taylorleds WU 2.5mm direct view video walls illuminating their worship stage: a main wall measuring 20 ft x 11.25 ft, flanked by two side walls at 14 ft x 7.9 ft, creating an immersive environment. This comprehensive approach aims to elevate worship services through cutting-edge technology, enhancing user experience significantly. We extend our special thanks to our integration partner, Illuminated Integration LLC, for their invaluable contribution to this transformative project.
