Enhancing the Entertainment Experience at Owensboro

Located in the heart of Owensboro, KY, **Owensboro Racing & Gaming** is a premier destination for live racing, immersive gaming, and exceptional dining. To enhance the guest experience, ATS-Pro delivered a state-of-the-art dvLED display solution that transforms both indoor and outdoor environments with cutting-edge visuals.

Outside, 16 **Taylorleds WG-HD Series** dvLED screens bring the excitement of racing and gaming to life. Built for durability, these high-definition displays withstand harsh weather conditions while delivering bright, clear visuals that ensure guests never miss a moment of the action. Inside, two **Taylorleds WU 1.9mm** LED screens further elevate the entertainment experience, including an impressive curved display that adds depth and immersion to the gaming environment.

All displays are powered by **NovaStar Technology** H Series processors, ensuring seamless integration, ultra-smooth motion, and uninterrupted performance throughout the venue.

This installation was made possible through the expertise and collaboration of **American Sound** and key contributors, including Tom Knauss, CTS-D, Greg Martin, CTS-D, CTS-I, and Chuck Flaminio from **NV5**. Their dedication and support were instrumental in bringing this vision to life.
