Bringing Innovation and Entertainment to Temple University

Located in the heart of **Temple University**, **Charles Library** is a state-of-the-art facility that serves as both an academic hub and a vibrant center for student engagement. Opened in 2019 the library continues to push the boundaries of innovation, reflecting Temple's long-standing commitment to excellence in education and research since its founding in 1884.

To enhance the student experience, we installed a **Taylorleds WX Pro 1.2mm** dvLED wall, measuring 14 ft by 8 ft tall. With a 3456 x 1944 resolution, this high-performance display delivers striking visual clarity, transforming the **Game Room** into an immersive entertainment space.

Powered by the **NovaStar Technology** H2 video wall splicer, a cutting-edge solution that ATS-Pro proudly helped introduce to the U.S. market, this installation elevates the gaming experience with precision and seamless performance.

This project was made possible through the expertise and collaboration of Bruce MacLelland and Bruce MacLelland Jr. from **Applied Video Technology**, along with Joe Blacker, whose support helped bring this vision to life.
