Transforming the Cafeteria into a Dynamic Meeting Space

ATS-Pro is proud to enhance communication and engagement at **Zoll Medical Corp in Romford, RI**, with a cutting-edge dvLED display installation in their cafeteria—an adaptable space used for both daily use and town hall-style meetings.

This installation features two wall-mounted **Taylorleds WX Pro Series LED walls**, designed to deliver impactful visuals and seamless content sharing. The first display, with a 1.5mm pixel pitch, features a 3840 x 1080 resolution and spans 18.90 feet wide by 5.31 feet tall. The second, with a 1.87mm pixel pitch, offers a 4096 x 1152 resolution, measuring 25.20 feet wide by 7.09 feet tall. Both displays are powered by **NovaStar A10S Pro graphics cards** and integrated with the **H5 Video Wall Splicer processor**, ensuring crisp visuals, smooth playback, and effortless content management—making this space versatile for both everyday dining and company-wide meetings.

A special thanks to **CommLink Integrations** for their expertise and collaboration in bringing this project to life.

We are proud to support Zoll Medical Corp in creating a more connected and engaging workplace.
