MOVING HEADS

ORON® H2
IP65 HYBRID PHOSPHOR-LASER MOVING HEAD

- ▶ The world's first IP65 hybrid phosphor-laser moving head
- ▶ Advanced 260 W phosphor-laser engine for exceptional performance
- ▶ High light output: 330,000 lux at 20 m
- ▶ Wide zoom range: 0.6° - 32°
- ▶ Advanced colour mixing with CMY and linear CTO correction
- ▶ Enhanced visual effects with 31 x gobos, 3 x frost filters, 6 x prisms, 1 x beam ovalizer
- ▶ Flexible control options including DMX/RDM, Art-Net, sACN, W-DMX™, and CRMX
- ▶ Including touring case insert to protect against impacts

OTOS® B5
IP65 BEAM MOVING HEAD

▶ IP65 rated beam moving head with 480 W discharge lamp
▶ 11,500 lux at 100 m, 511,000 lux at 15 m
▶ High quality optics with 205 mm front lens
▶ Continuous CMY colour mixing + 14 dichroic filters for saturated colours and whites
▶ Particularly narrow beam angle of 1°
▶ Static gobo wheel with 19 gobos + open
▶ 3 rotatable and indexable prisms on two levels (overlapping)
▶ Easy handling and low weight (33 kg)
▶ Flexible control options via integrated W-DMX™ transceiver, DMX and RDM

OTOS® H5
IP65 BEAM SPOT WASH HYBRID MOVING HEAD

▶ IP65 rated beam spot wash hybrid moving head with 19,000 lm luminous flux
▶ Continuously adjustable CMY colour mixing in addition to 15 dichroic filters for saturated colours and white tones
▶ High-quality optics with 135 mm front lens and especially wide zoom range of 2° - 42°
▶ Rotating gobo wheel with 8 indexable and rotatable replaceable glass gobos + open
▶ Static gobo wheel with 19 gobos + open
▶ 2 rotatable and indexable prisms for varied mid-air effects
▶ High CRI filter (>80) for enhanced colour reproduction and adaptation to TV and film cameras
▶ Variable frost filter for use as a wash light
▶ Flexible control options via a built-in W-DMX™ transceiver, DMX and RDM

OTOS® SP6
IP65 SPOT PROFILE MOVING HEAD

▶ IP65 spot profile moving head with 600 W LED and 86,800 lux
  at 6° beam angle
▶ High-quality optics with 130 mm front lens and large 6° - 46° zoom
▶ Uniform projection without hotspots throughout the zoom range
▶ CMY colour mixing and additional colour wheel with 6 dichroic
  filters + open
▶ Rotating gobo wheel with 7 indexable / rotatable, exchangeable
  glass gobos + open
▶ Static gobo wheel with 7 interchangeable glass gobos + open
▶ 4-blade framing system with +/- 45° rotation
▶ Linear CTO correction (2,600 K - 7,000 K)
▶ Selectable pulse width modulation (up to 25 kHz)
  for flicker-free operation
▶ Flexible control options: DMX, RDM, Art-Net, sACN,
  W-DMX™, CRMX
▶ Easy handling and low weight (34 kg)
▶ Supplied in matching flight case insert

OTOS® WASH SERIES
IP65 WASH MOVING HEAD

- 7 x 50 W / 16 x 50 W / 32 x 50 W RGBL LED with a total output of 3700 / 9900 / 19,500 lm luminous flux
- Single Pixel Control
- Controllable LED effect ring
- Zoom lens and zoom range 4° - 60°
- Dual zoom enables two individually controllable zoom levels (W6)
- Multi-zoom enables three individually controllable zoom levels (W12)
- Dual input mode as option for pixel mapping
- Flexible control options via integrated W-DMX™ & CRMX transceiver, DMX and RDM

OPUS® X PROFILE
HIGH-POWER PROFILE MOVING HEAD

▶ High-power profile moving head with 33,000 lm / 72,000 lux (at 5 m)

▶ CMY colour blending and additional colour wheel with 6 dichroic filters

▶ High-quality optics with 170 mm front lens and extremely wide
zoom range of 6° - 48°

▶ Angle and position of each diaphragm slider adjustable to
complete closure

▶ Rotatable animation wheel, rotating gobo wheel and static gobo wheel

▶ Rotatable and indexable circular fivefold prism and linear sixfold prism

▶ Variable frost filter for wash light effects and continuously adjustable iris

▶ Smooth dimming with 16-bit resolution and 4 selectable curves

▶ Battery-powered touchscreen display with rotary encoder

▶ Flexible control via built-in W-DMX™ transceiver, DMX, RDM,
Art-Net or sACN

▶ High CRI Gobo included in the scope of delivery
(Art.No.: CLOXPHCRIGOBO)

OPUS® X WASH
HIGH-POWER WASH MOVING HEAD

▶ High-power wash moving head with 32,000 lm
▶ CMY colour blending and 2 additional colour wheels,
   each with 6 dichroic filters
▶ Linear CTO correction to 2,600 K
▶ High-quality optics with 170 mm PC lens and extremely wide zoom
   range from 5° - 46°
▶ Even and flat projection field without hot spots at any zoom angle
▶ 4-blade framing system with +/- 45° rotation, individually
   controllable up to full blackout
▶ Variable frost plus stepless iris
▶ Flicker-free operation thanks to selectable PWM frequencies up to 25 kHz
▶ Battery-powered touchscreen display with encoder wheel for
   offline configuration
▶ Flexible control via built-in W-DMX™ Transceiver, DMX, RDM,

DVC SERIES
DMX INTERFACES

DVC PRO
▶ USB interface with 1024 DMX channels in live mode (extendable via Art-Net)
▶ Integrated Flash memory for 256 DMX channels in standalone mode (extendable to up to 1024 channels)
▶ User-friendly, intuitive Cameo DMX software "by Daslight" for Windows and Max OS available for free download
▶ Internet connection required for hardware registration and software activation
▶ Over 15,000 device libraries and a built-in ScanLibrary editor for creating and editing your own device profiles
▶ Powerful XEEL engine for hundreds of impressive pixel and video effects and movements for moving heads and scanners
▶ Touchscreen control plus remote control of essential features via iOS and Android smartphones and tablets or MIDI controller

▶ Built-in access point for remote control via Wi-Fi in standalone mode
▶ Audio analyser and MIDI clock for synchronising lightshow and music speed
▶ Real-time programming and 3D visualisation of lightshow
▶ Compatible with Light Raider app on Android and iOS devices (free 30-day trial version available for download)

DVC CUE CLDVCCUE
▶ 1024 DMX channels in live mode, 512 DMX channels in stand-alone mode
▶ Expandable from 2 to 4 DMX 512 universes (2048 DMX channels)
▶ Intuitive backlit keyboard with 10 buttons for direct access
▶ 99 scenes across 5 zones and calendar triggering (only possible with optional ESApro 2 software)
▶ USB and Ethernet for programming/control
▶ User-friendly, intuitive Cameo DMX software "by Daslight" for Windows and Mac OS X as a free download
▶ Smart Upgrade Technology (SUT)

CLIDMXCORE

ECO-FRIENDLY
With highly efficient energy use, a very long LED lifetime and low heat emission, this fixture is environmentally friendly.

LED TECHNOLOGY
LEDs are extremely advantageous for the use in lighting systems: they are bright, emit very little heat, have a very long lifetime and low energy consumption. Also, LED fixtures often weigh less than conventional fixtures.

COB LED TECHNOLOGY
The "chip-on-board" multi-LED array is a recent technology that produces a high-density large area light source with high brightness and uniform diffusion for a rich wash of colours.

DISCHARGE LAMP
Discharge lamps are highly efficient and exceptionally bright providing stable light output, good colour rendering and long lifetime.

FULL DIODE LASER
The pure diode design provides an increased life span and much higher efficiency compared to temperature-dependent DPSS laser sources.

LASER
Its marked directional impact means laser light remains bright and clearly visible over distances. Lasers are highly energy-efficient andcreate tightly clusterd, narrow beams of light that are ideal for creating pronounced lighting effects.

RGB ADDITIVE COLOUR SYSTEM
Additive colour mixes use varying amounts of red, green and blue to produce other colours and white. The RGB system is used in television, computer monitors and digital cameras to name a few.

RGB ADDITIVE COLOUR SYSTEM + WHITE LEDS
Adding white LEDs to the RGB system produces more contrast and definition and enhances the RGB generated white and pastel colours.

RGB A
Has a wide colour palette with the colours red, green, blue and amber.

RGB WA
RGB additive colour system plus white and amber LEDs.

RGB AL
This luminaire uses RGBAL colour mixing to reproduce nearly any colour and colour temperature of white.

RGB WAL
Featuring red, green, blue, white, amber and lime, RGBWAL multichip LEDs are eminently suitable to produce rich, saturated colours and and a wide spectrum of whites with excellent CRI.

RGB L
Has a wide colour palette with the colours red, green, blue and lime.

RGB ALC
Has a wide colour palette with the colours red, green, blue, amber, lime and cyan.

UV
UV or black lights are employed for decorative and artistic lighting effects.

COLD WHITE
"Cold white" is a clean, very bright light in the 5,000 - 10,000 K range with a somewhat artifcial touch that goes well with deeply saturated primary colours. Measured in degrees of Kelvin (K), colour temperature indicates the properties of light sources.

DAYLIGHT
Daylight colour temperature.

NATURAL WHITE
Neutral white colour temperature

WARM WHITE
"Warm white" is in the 2,000 - 4,000 K range providing a soft light with a slight touch of yellow that is natural and pleasing to the eye. Measured in degrees of Kelvin (K), colour temperature indicates the properties of light sources.

TURNABLE WHITE
The tunable white feature allows setting of a range of white tones.

DMX512
Created in 1986, DMX512 is a communications standard for lighting equipment. up to 32 DMX fixtures can be daisy-chained and controlled by a dedicated source, e.g. a lighting console. In a DMX512 daisy chain "network", the controller is called "master" while the daisy-chained fixtures are the "slaves."

W-DMX™
This fixture features W-DMX™ technology for wireless DMX control.

RDM-ENABLED
This fixture is RDM-enabled. The Remote Device Management protocol extension to DMX allows bi-directional communication over a standard DMX network for the convenient configuration, management and monitoring of RDM devices connected to a dedicated RDM controller.

RJ 45
Equipped with an RJ45 connection that enables the Ethernet connection and thus control via a network protocol.

STANDALONE MODE
In "standalone" mode, this fixture uses built-in programmes to control its functions. There is no need for a lighting console or "master" controller.

"MASTER" AND "SLAVE"
Simply put, this fixture is able to control or be controlled by other fixtures. In "master" mode and first in a chain, the fixture acts as a controller for fixtures ("slaves") that are connected to its output. In "slave" mode, the input of the fixture is connected to the output of a lighting console or "master." Fixtures that are daisy-chained to a slave's output also act as slaves.

WIRELESS MASTER/SLAVE
Simply put, this fixture is able to control or be controlled by other fixtures. In "master" mode and first in a chain, the fixture acts as a controller for fixtures ("slaves") that are connected to its output. In "slave" mode, the input of the fixture is connected to the output of a lighting console or "master." Fixtures that are daisy-chained to a slave's output also act as slaves.

ART-NET
This fixture is Art-Net compatible.

sACN
This luminaire is compatible with the sACN (Streaming ACN) protocol developed to transport DMX data over a network.

KLINGNET
Compatible with KlingNet to connect lamps together and control them synchronously without complex cabling or separate control devices.

WIFI
This device is compatible with all WiFi standards.

IDMX® APP CONTROL
Controllable via the iDMX app from Cameo®.

ANDROID
Compatible with Android.

APPLE
Compatible with Apple devices.

WINDOWS COMPATIBLE
This fixture is delivered with a software allowing control via computers running on Windows.

FOOT PEDAL REMOTE
Can be controlled via foot pedal.

CABLE REMOTE
Controllable via cable connection.

REMOTE CONTROL
Can be controlled via remote control.

EZ REMOTE
The EZ Remote function simplifies the control of Cameo® products in a clear menu for configuring various indicators of the lamp.

ILDA
ILDA (standing for „International Laser Display Association") enables the synchronisation and control of various laser devices for the creation of precise and synchronised laser projections.

iDMX STICK
The product has an input for the iDMX stick from Cameo® and can therefore also be connected wirelessly to a DMX network.

iDMX
iDMX is used for wireless DMX connections and is a type of protocol from Cameo®.

UNICON
Compatible with the UNICON® from Cameo®. This enables the control of both in-house and cross-brand DMX spotlights. For Cameo® products, it is also possible to display the respective menu in order to control the product via cable connection.

SOUND CONTROL
In "sound to light" mode, the fixture is controlled by a built-in microphone capturing sounds to activate colour changes, e.g. the beat of the music.

SINGLE PIXEL CONTROL
This device features Single pixel control. With individual LED pixel on / off status and colour control this fixture is capable of creating animated patterns and video panel style pixel-mapping effects.

SEGMENT PIXEL CONTROL
In comparison to single-pixel control, entire pixel segments can be controlled individually.

ANALOG MODULATION
Analogue modulation is possible.

STROBE LIGHTING
Strobe lights emit a large number of periodic flashes per second seemingly freezing the movement of objects thus creating the illusion of slow motion.

FLICKER-FREE
The high-frequency control of the LEDs while dimming ensures flicker-free operation, including for filming purposes.

DIM TO WARM
The dim-to-warm function can be used to simulate the colour temperature drift of a traditional filament lamp.

EZ CHASE
DMX EZChase is the internal delay function of the DMX control command. This enables a chase to be created with a very small number of DMX channels or even without a DMX controller entirely.

CALIBRATION CHIP
The calibration chip ensures that the mixed colours of the lamp are reproduced identically when using serveral fixtures, thereby preventing any deviations in colour between the lamps.

GDTF FILE
A GTDF file is available.

BATTERY POWERED
This product is partially to fully battery-operated.

SNAPMAG® TECHNOLOGY
This fixture features SnapMag® technology that enables mounting SnapMag® filter frames in an instant without the need for tools.

PAN & TILT
This moving head fxture features two high-speed high-torque motors for horizontal and vertical rotation (pan and tilt) which are controllable independently.

UNLIMITED ROTATION
This moving head fixture features two high-speed high-torque motors for infinite horizontal and vertical rotation (pan and tilt).

MULTIPLE ANGLES
This fixture provides multiple beam angles and shapes using the included or optional light shaping diffusers.

ZOOM FUNCTION
Enables individual control of one or more zoom levels.

CMY
This luminaire uses a white light source and subtractive CMY (cyan, magenta, yellow) colour mixing for an extremely wide range of hues.

LINEAR CTO
This luminaire features continuously variable CTO (colour temperature orange) correction converting cool white to tungsten and warm white.

COLOUR WHEEL
Equipped with multiple colour filters, rotating the colour wheel enables virtually instant colour changes.

FOCUS
The focus adjusts the beam edge from hard to soft and gobo projection to any distance.

IRIS
The iris is an adjustable circular aperture to continuously vary the beam diameter.

FROST FILTER
Contains an integrated frost filter that ensures soft edges on the light source.

GOBO WHEEL
Gobo wheels hold a selection of fixed or rotating gobos made of metal or glass. Basically, gobos are stencils that allow you to project patterns, shapes and images.

LINEAR PRISM
A linear prism multiplies the beam or gobo projection by the number of facets and arranges the result in a line.

CIRCULAR PRISM
A circular prism multiplies the beam or gobo projection by the number of facets and arranges the result in a circle.

4-SHUTTER FRAMING BLADES
Similar in effect to barn doors but much more flexible, the 4-blade framing shutter system is designed to shape the beam edge. Each blade can be moved and angled independently to full blackout. The entire system can be rotated by 45 degrees in both directions enabling exact positioning.

ANIMATION WHEEL
Providing 3D movement in the light beam, the rotating animation wheel is most effective when used in combination with gobos.

SCAN FAIL SYSTEM
Should the motors guiding the laser beam encounter an error that results in the emission of a static laser beam, the device will immediately shut down laser output.

DUST PROOF
The housing is protected against the entry of dust.

INGRESS PROTECTION RATING OF 44
Classified to IP44 and therefore protected against solid foreign bodies >1 mm and splash water.

INGRESS PROTECTION RATING OF 65
The IP code rates the degree of protection against the intrusion of solid objects, water and access to hazardous parts. This fixture is completely protected against hazardous contact, water jets and ingress of dust.

INGRESS PROTECTION RATING OF 67
Classified to IP67 and therefore impermeable to dust and protected against secondary immersion in water.

IK08
In electrical engineering, the IK impact resistance grade is a measure of the resistance of components to impact and shock loads. For this product, the grade IK08 applies and corresponds to up to 5.0 joules. Equivalent to a 1.7 kg hammer blow.

ETL
This Product is ETL certified.
