

ATS PRO Project Highlight

Taylorleds **American Sound** **CASINO RESORT**

WA & WU PRO SERIES 2.5MM | 60 FT DIA | 14' X 7.9'

TERRE HAUTE, IN - This ambitious installation features a striking double-sided ring with a 60-foot diameter, utilizing our Taylorleds WA 2.5mm products. The outer ring spans 202 feet in width and 5.9 feet in height, with the inner ring measuring 197 feet wide by 5.9 feet high. Central to this setup is a center-hung, double-sided ring powered by a Nova Star H9 Video Wall Splicer.

Additionally, the project includes two 14' x 7.9' WU 2.5mm video walls located in the Event Centers, each powered by a Nova Star H5 Video Wall Splicer. The Taylorleds WA series products are chosen for their flexible modules, which are essential in creating a smooth surface on curved walls, ensuring visual continuity and aesthetic excellence across the venue. This project would not be possible without the help of NV5's design consulting and American Sound for integration.
